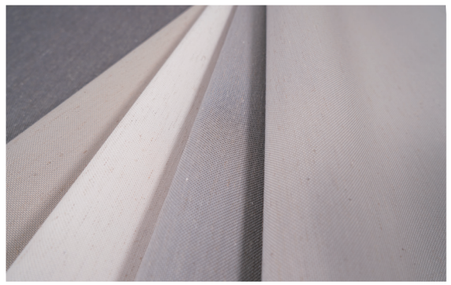
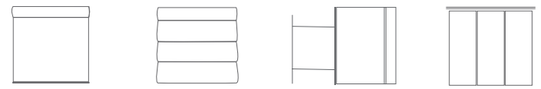
Linen-Enhanced Screen Fabric

Naxos features a refined woven construction blending PVC-coated polyester with 16% linen fibers, delivering organic texture with a more natural visual character. At 5% openness, it provides balanced daylight control with comfortable glare reduction and clear outward visibility. Designed for interiors that prioritize both performance and materiality, Naxos brings a warmer, more residential feel to standard screen applications. A versatile solution that bridges technical performance with elevated design.



Applications



ROLLER SHADES

ROMAN SHADES

SKYLIGHT TRACKS
