* All materials can be made to be shade with max width of 94” and max height 96” (Only TDBU with max width 84”)

EDGE BINDING OPTIONS

* **All edge binding options have an additional charge.**

* Due to the specific characteristics of the fabrics, it is essential to choose Edge binding as a mandatory option for the following collections.

“Evergreen, Luana, Kophi, Sardinia, Mallorca, Forest, Earthy”.

* The collections that require Edge binding as a mandatory option also incur an additional cost for the Edge binding. The Edge binding price is not included in the Base price.

* Edge binding is applied to both the shade and valance sides

* SN(1") / N(1 ½") / W(3") taps are available

Collection Name	Color	Color Code	Available tape size
Twill Edge Binding	White	TWEB-01	N(1.5") and W(3") Tapes available (Half wide on the face of the shade)
	Ivory	TWEB-02	
	Cream	TWEB-03	
	Beige	TWEB-04	
	Taupe	TWEB-05	
	Bronze	TWEB-06	
	Copper	TWEB-07	
	Chocolate	TWEB-08	
	Grey	TWEB-09	
	Black	TWEB-10

	Steel Grey	FSEB-06	
	Dark Brown	FSEB-07	
	Black	FSEB-08	

LINER OPTIONS

*** All fixed liner options have an additional charge.**

(Movable liners (Twin shades) have a different price from the fixed liners.)

* Available in light-filtering or black-out. They are attached to the back of the shade with stitches on each side of the liner. (Fixed Lining)

* All valances are made with lined valances to conceal the head rail components. If you want an unlined valance, please make sure to specify it on the order form.

Collection Name	Color	Color Code

Valance Only				18"	94"		

* The exact flush inside mount depths may vary slightly depending on the fabric thickness

* Size variation tolerance: Width +/- 1/8" / Height +/- 1/4" / Twisting 1"

* IB with valance returns, required extra deduction on headrail as below (except TDBU, Twin shades)

Fabric thickness group 1: 5/8" / Fabric thickness group 2: 3/4" / Fabric thickness group 3 : 1"

(See page 15 for detailed thickness information per fabric)

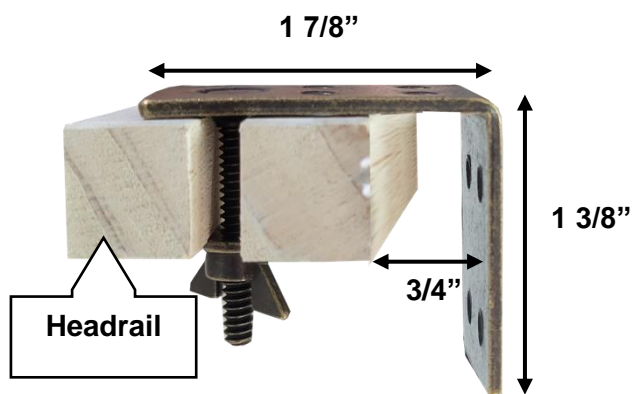

BRACKET / HEADRAIL / BOTTOM RAIL SPECIFICATIONS

* Install Brackets

Height : 1 3/8"

Depth : 1 7/8"

Minimum IB Depth : 3/4"

* Headrail

- Depth Size: Available in 5 sizes of headrail (1", 1 ½", 2 ½", 3 ½", 5")

	CONTROL TYPE								
Headrail Depth Size	Cordlock	Continuous Cord	Cordless	TDBU	Wand Motor	Motorized	Movable twin shade (w/ cordlock)	Movable twin shade (w/cordless) (w/continuous cord)	Motorized twin shades(2 Motors)
1 1/2" (Standard Size)	O	O	O	O					
1" (Narrow size) *Special request only /not recommend	O								
2 1/2"					O	O	O		
3 1/2"								O	
5"									O

- Color: Available in 6 Colors. Unless a specific color is requested, the shade will be made in color-coordinated colors.

White

Pine

Grey

Brick

Brown

Charcoal

* Bottom rail

Our standard flat bottom rail is used for most types of shades. (Cord lock, Continuous cord, Motorized, Wand)

However, for cordless shades, we use a thicker bottom rail to increase the weight, enhancing their functionality and durability.

In cases where a customer specifically requests a hold down brackets., we will use a specially designed round bottom bar to ensure the shades remain securely in place and provide the desired level of stability.

<hold down brackets>

STYLES OPTIONS

* **Standard Shade (with valance)**

- The shade material is securely attached to the back of the headrail, and a 6" valance is provided to conceal the internal components.
- Valance returns standard on outside mount / Valance returns for inside mount available upon request.
- Shades operated by cords (cord lock or cord loop) have their controls located in front of the shade.

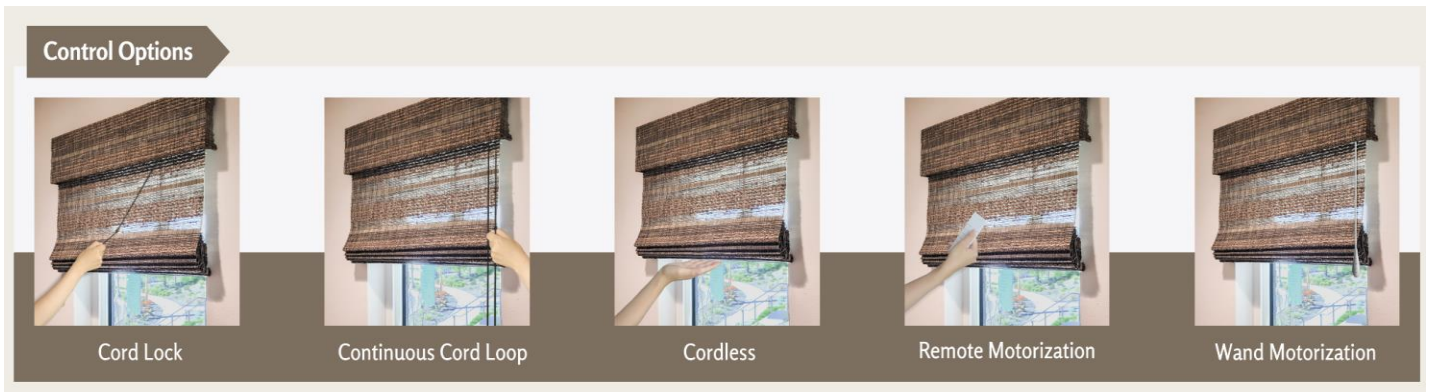

* **Waterfall Shade (without valance)**

- The shade material is attached to the front of the headrail **without a valance**. When you raise the shade, it forms flat folds from the bottom.
- Back valance is optional. Back valance can be made from same fabric or only liner fabric.
- Shades operated by cords (cord lock or cord loop) have their controls located behind the shade.

* **Top Down/ Bottom Up (TDBU) Shade (with valance)**

- TDBU (Top-Down/Bottom-Up) shades have the standard control position: the right control operates the middle rail, and the left control operates the bottom rail.
- Top-Down/Bottom-Up shades are made on a 1 1/2" depth headrail
- Only available with cord lock control.
- Not available with Waterfall style.

CONTROL OPTIONS

* Cord Lock Control (Standard)

- The Cord Lock control system allows easy raising and lowering of the Natural shade using cords threaded through a lock mechanism.
- Pull the cords to raise and release gently to lower the shade, providing a simple and effective way to adjust it to the desired position.

* Continuous Cord Loop with Clutch

- Continuous Cord Loop allows smooth and continuous operation using a looped cord. Simply pull the looped cord to effortlessly raise or lower the shade to your preferred height. Its consistent length ensures easy and precise adjustments.
- To ensure smooth operation of the clutch system, the fabric is manufactured with a 7/8-inch deduction from the ordered width. (When ordering shades with returns, the fabric will be manufactured with a deduction of 1 1/8 inches from order width)
- 2ft, 3ft, 4ft, 5ft and 6ft
- Not available as 3 on 1 headrail, but 2 on 1 headrail is an option.
- Top-down/bottom-up function is not available.
- Brown / Grey / Beige color is available
- Stainless chain is available
- Installation of a tensioner for child safety is mandatory.
- During operation, Cord may rub against side of the shade. Edge binding is highly recommended.

* Cordless

- Cordless shades offer a convenient operating system without lift cords on the front. Instead, these shades are lowered by simply pulling on the hem bar.
- A spring control system, discreetly positioned under the wooden headrail, allows users to stop the shade at any desired height securely.

<Spring control system>

- Please note that the cordless option is not available for TDBU (Top-Down Bottom-Up) shades
 - For ease of use, clear grips are included on the hem bar of cordless shades.
- (1 grip for shades up to 70 inches wide, and 2 grips for shades over 70 inches wide.)

<Clear grip>

* Wand Motorization

- Wand control shades are powered by rechargeable batteries. To recharge the batteries, simply plug a mini USB power adapter into the end of the wand.
- The motor is controlled using a wand, which hangs down to the side of the shade
- Waterfall shades do not come with wand controls.
- Wand Color: Available in White, Cream, Grey, Brown, Black
- Wand lengths: Available in 24", 36", 48" and 60"
- For wand control shades, the shade fabric on the control side will be 5/8" narrower for inside mount and 7/8" narrower for outside mount compared to

the ordered width. This allows the wand to hang to the side of the shade and may result in a light gap on the control side of inside mount blackout shades.

* Remote Control Motorization

DC Battery Powered Motor

AC Hardwired Motor

- DC Battery Powered Motor/ Quiet DC Battery Powered Motor:

Shades are operated by re-chargeable lithium-ion battery motor. Specially, the quiet motor makes the lifting process quieter

- Small DC Motor

Small DC motor allows to produce shades with smaller widths, starting from 15 inches and above. To operate the shades, you have two options: either purchase an external battery pack(8 pack batteries) or use an adapter to plug in the charger cord without the need for a transformer.

- AC Hardwired Motor: AC 100-240V Hardwired Tubular Motor / Requires installation by an electrician

- Remote, USB Charger, Solar panel charger:

- Available Single and Multi-channel (15 Shades) remote
- Available Single and Multi-channel (15 Shades) wall switches

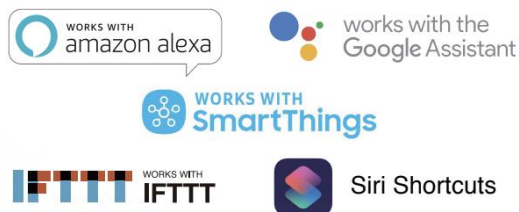

- Available USB 10ft Charger (Shade battery recharged via a port in the motor head.)
- Available Solar panel charger (Only for direct sunshine)

- **Smart Connector Hub(P-BOX)** : P-Box is an evolved new generation of hub enabling adaptable and reliable interaction of motorized window covering system with cloud ecosystem. (Straightforward LAN cable connection, or alternative Wi-Fi)

- Note: Max 30 motors / Max 20 scenes/ Max 20 rooms / Max 20 timers / Max 100ft

IoT Connectivity

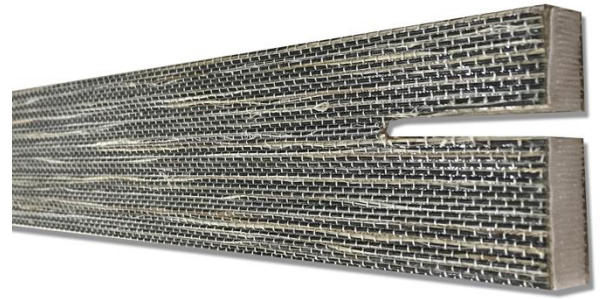

Home Automation Intergration

ADDITIONAL OPTIONS

* Fabric-Wrapped Headrail

- Fabric-wrapped head rails add a decorative touch to complete the look.
- Fabric-wrapped head rails have an additional charge.

* Movable Liners (Twin Shade)

- Movable liner shades, also known as twin shades, consist of a separate liner with its own controls, along with two sets of controls: one for the front shade and another for the liner behind.
- These controls can be on the same side or opposite sides; the standard is on the same side.
- The controls can be cord locks, continuous cord, cordless controls, and motorization (using a wand or remote).
- Twin Shades are not available as 3-on-1 head rail.

* Multiple shades on one head rail

- Size Limitation: Maximum Headrail Width: **103" combined**
- 2-on-1 Headrail / 3-on-1 Headrail(The gap between shades will be no more than 1/2")
- Order width: Total width / Each width (Shade 1,2 3)
- No extra charge
- Price as sperate shades
- Oversized shipping charge based on width combined

* Lined Valance (Standard) / Back Valance / Valance Returns

- Lined valances as standard.
- If you order the shade with a liner, the valance will also have the same liner. If you order the shade without a liner, a blackout white (BL-01) liner will be placed behind the valance.
- Standard valances are 6" in height. When shades are under 18" in width, the valance is 4" in height for improved proportion.
- Custom valances up to 12" in height may be ordered.
- Returns standard on outside mount only
- The valance returns are in L shade with 3M adhesive tape to attach to the valance. The returns standard length is 4.5" long.

<Valance returns>

ORDERING NOTE

- **CANCELLATION OF ORDERS:** Once production has begun (usually within 1 business day after order is received), the order CANNOT be cancelled
